## EXPERIENCE

### Software Engineer Intern

#### Inventron technology

2023 Nov– 2024 Apr

Bengaluru, Karnataka

- Developed customer-centric web applications using HTML, CSS, JavaScript, React, Node.js, and modern web technologies.
- Optimized database queries and performance for efficient data retrieval and management.
- Collaborated with cross-functional teams to define, implement, test, deploy, and maintain software across products.
- Conducted troubleshooting investigations, gathered customer feedback, applied fix tools, and tested workflows.
- Performed backend tasks such as capturing logs, querying databases, updating fields, and cycling servers.
- Documented activities, resolutions, and knowledge articles throughout the investigation lifecycle.
- Prioritized work based on customer needs, business requirements, and project timelines.

## PROJECTS

### Amazon Clone

- [github.com/rehanrakesh/Amazon-Clone](#)
- Developed a static Amazon clone using HTML and CSS, replicating the design of the Amazon home page. Focused on creating a responsive layout, mimicking the user interface elements, and ensuring cross-browser compatibility. Demonstrated skills in front-end development and attention to detail in recreating a well-known e-commerce platform's aesthetic.

### Expense Tracker

- [github.com/rehanrakesh/Expense-calculator](#)
- Developed an Expense Tracker Application using Java and MySQL to help users manage their finances effectively. Implemented features for adding, updating, and categorizing expenses, as well as generating detailed reports. Emphasized user-friendly interface design and efficient data management, demonstrating strong skills in backend development and database integration.

### Calculator App

- [github.com/rehanrakesh/Calculator-App](#)
- Created a Calculator App using JavaScript, HTML, and CSS, providing basic arithmetic operations with a clean and intuitive user interface. Focused on responsive design and seamless user experience. Demonstrated proficiency in front-end development and JavaScript functionality.

### To-Do List Application

- [github.com/rehanrakesh/todo](#)
- Developed a To-Do List Application using JavaScript, HTML, and CSS to help users organize and prioritize their tasks. Implemented features for adding, editing, and deleting tasks, with a focus on responsive design and user-friendly interface. Showcased skills in front-end development and dynamic web application functionality.

## SUMMARY

- Dedicated BCA graduate with a strong foundation in computer applications and a passion for technology. Eager to apply academic knowledge to real-world challenges and contribute to innovative projects. Demonstrates excellent problem-solving abilities, strong analytical thinking, and a commitment to continuous learning. Seeking opportunities to grow and make a positive impact in the tech industry.

## EDUCATION

### Bachelor of Computer Application

#### Bangalore City University

2024

Bengaluru, Karnataka

## CERTIFICATIONS

- Google Cybersecurity Professional Certificate (8 courses), Google

## TECHNICAL SKILLS

- HTML • CSS • JavaScript • Bootstrap
- React.JS • Redux • Vue.JS
- MVC • PHP • MySQL

## SOFT SKILLS

- Problem-Solving
- Analytical Thinking
- Team Collaboration
- Effective Communication
- Adaptability
